

Please do not take any steps that would weaken the current NJ "Do not call" act. I still get calls, in spite of being registered, but have appreciated the reduction in volume that being on the list has created. Currently, I am inundated daily with junk mail solicitations from mortgage companies, credit card companies, finance companies and feel very strongly the quality of my life is affected by the number of calls I will get if the "do not call" act is changed. I hope you will listen to the families of New Jersey. The quality of our life is affected by the congestion of our roads, the constant developing in our towns, overcrowding of classrooms. Please allow us this one benefit, assurance that if we choose we will not be hounded with solicitations over our phones.
